

## Research Associate Position at York University, Toronto, Canada

The Lassonde School of Engineering, York University (<http://lassonde.yorku.ca/>) is sponsoring a full-time research associate position in deep learning for natural language processing (NLP). This position is comparable with a research professorship (with annual salary up to \$85k), an initial two-year appointment but extendable. This research position is created to support the cutting-edge research activities in NLP, particularly applying deep learning to the challenging NLP or AI problems, including (not limited to) information extraction, language understanding and inference, and probabilistic reasoning.
