

## Speech Science Job Opening

We're looking for a candidate to help expand the language coverage of our speech enabled services. We are looking for an individual who understands in detail the current state-of-the-art speech recognition technologies, including acoustic modeling and language modeling, and has knowledge and interest in how to apply these across many languages.

Areas of focus include:

- Acoustic modeling
- Determining appropriate phonetic units
- Letter to sound mechanisms
- Language modeling
- All of the above across many languages

Requirements are:

- Deep knowledge of state-of-the-art speech recognition techniques
- Strong programming abilities
- Desire to work as part of a small team in a fast paced environment

Send resumes to [info@vlingo.com](mailto:info@vlingo.com)

## About Vlingo

Vlingo is a Virtual Assistant that turns your words into action by combining speech recognition, natural language processing, and Vlingo's Intent Engine to understand the user's intent and take the appropriate action. Simply speak to your phone to connect with the people, businesses and activities that are important to you. Vlingo is the safest and easiest way to get things done while on the go. Send text and email messages, search the web, use Google maps, update Twitter and more. Founded in 2006, Vlingo is backed by Charles River Ventures, Sigma Partners, Yahoo! and AT&T and headquartered in Cambridge, Massachusetts. For more information, go to [www.vlingo.com](http://www.vlingo.com).
