

## **JOB DESCRIPTION:**

Title: Development/Speech Integration Engineer

Location: Merelbeke, Belgium

Type: Permanent

### **Job:**

#### Overview:

Nuance is the leading provider of speech and imaging solutions for businesses and consumers around the World. Our technologies, applications and services make the user experience more compelling by transforming the way people interact with information and how they create, share and use documents. Every day, millions of users and thousands of businesses, experience Nuance by calling directory assistance, getting account information, dictating patient records, telling a navigation system their destination, or digitally reproducing documents that can be shared and searched. Making each of those experiences productive and compelling is what Nuance is all about.

#### Responsibilities:

Nuance is seeking a Development/Speech integration Engineer who possesses a solid background in application programming and embedded systems.

Candidates should enjoy working in a fast-paced, collaborative atmosphere that applies speech science in a commercial, result driven and customer oriented setting.

In this role, you will be responsible for porting Nuance state-of-the-art speech recognition and text to speech products to different embedded platforms typically found in the automotive or mobile market. As development engineer in the Professional Services team, you will be in close contact with the research lab developing the technologies, and will be contributing to speech enabling , automotive hands-free car-kits, automotive and mobile navigation systems, or similar kind of

devices where speech is bringing clear added value. You will be working together with our customers' integration teams to help them including our technologies into successful products in an efficient way. While most of the job will take place in our offices in Merelbeke, a few short trips per year inside or outside Europe might be possible.

#### Qualifications:

- Bachelors or Graduate University degree in Electrical Engineering, Computer Engineering, Computer Science or equivalent. Newly graduated or having a few years of professional experience
- Fluent in English, both written and spoken
- Strong C/C++ programming skills
- Good software/system problem-solving skills
- ability to travel for short trips
- Strong team player, capable to work independently when needed
- Self learner, with sense of initiative, and perseverance to deliver high quality work
- Strong analytical and problem solving skills and ability to troubleshoot issues
- Positive "can-do" attitude, well organized, focusing on achieving results cost-effectively
- Good judgment and quick-thinking
- Excellent written and verbal communications skills
- Ability to scope work taking technical, business and time-frame constraints into consideration
- Mastering Office applications

#### Beneficial Skills:

- Experience with embedded hardware platforms, operating systems, and software development
- Knowledgeable about audio streaming technologies, real-time protocols, codecs, signal processing
- Knowledgeable about WinCe, Linux, QNX, or ultron
- User interface development and/or testing experience
- Experience with mobile platforms such as Android
- Operational knowledge of other languages (French or other)
