***Research Positions at HLT, National University of Singapore, Singapore***

- Speech Recognition (Acoustic Modeling and/or Language Modeling)
- Speaker Recognition
- Spoken Dialogue
- Natural Language Processing
- Multimodality Speech Processing

The Human Language Technology Lab at the National University of Singapore is seeking to fill several research positions. The immediate openings include **Research Engineer, Research Fellow (post-doctoral fellow), and Senior Research Fellow**.

Research Engineer candidates should hold a B.Sc or M.Sc degree and show evidence of strong programming skills and foundation knowledge. Research Fellow candidates should hold a Ph.D degree (Electrical and Computer Engineering, Computer Science) and show evidence of a strong publication record and/or project experience in the fields.

All candidates should have good oral and written English communication skills, be able to work independently in an international team. The initial appointment is for a period of two years, and the employment contract is renewable for a long term appointment. Five (5) positions are available immediately in 2020 until they are filled.

Selected candidates will be offered internationally competitive salaries and benefits, with support to travel to conferences for dissemination of research results. Singapore is a vibrant, well-connected city with low taxes. It is a global research hub in Asia. NUS is a world-class university that provides an outstanding, supportive research environment.
