

The Computational Linguistics group at the University of Bielefeld [1] offers two full-time, 3-year positions for researchers (PhD or PostDoc) in NLP. We are a young, newly established and supportive team. We are looking for candidates interested in topics related to language generation, computational semantics and pragmatics, dialogue, multimodality and language grounding. All applications are welcome.

The application deadline is the 18th of June.

PhD position: the position is part of an interdisciplinary project on computational argumentation. The PhD candidate will develop NLP methods for analyzing and explaining the meaning of hypotheses stated in scientific texts.

Full details at: https://www.uni-bielefeld.de/uni/karriere/stellen-wiss/wiss21094_englisch.pdf

Project page: <https://inas-argumentation.github.io/>

PostDoc position: the position is not tied to a particular project, the candidate will have the chance to develop her own research agenda. The position involves four hours of teaching per term.

Full details at: https://www.uni-bielefeld.de/uni/karriere/stellen-wiss/wiss21095_englisch.pdf

Please send applications (a CV and a short motivation) or questions by email to Sina Zarriß, sina.zarriess@uni-bielefeld.de. Applications received by *June 18, 2021* will receive full consideration. The position is open until filled.
